

For Immediate Release

ExpressYard Releases a Free 500-byte Data Exchange File Uploader

Flint, MI. – May 20, 2008 – ExpressYard announced today the release of a free tool for uploading 500-byte freight car repair billing files to Railinc’s Data Exchange found at: <http://www.expressyard.com/crbupload>. This was done in response to AAR Circular C-10646, which states that as of January 2008, a freight car repair invoice must be transmitted through the AAR Data Exchange to be valid.

“We’re just trying to make everyone’s job a little easier. Uploading to the Data Exchange has become required, and not everyone has the ability to upload their data files automatically using their billing system,” said Justin Gillam of ExpressYard. “Our new upload tool makes it easy for any contract shop or railroad to submit their data to the Data Exchange.”

About ExpressYard

The ExpressYard repair billing and operations management system (<http://www.expressyard.com>) is currently used at over 150 repair facilities across North America which includes contract shops, regional and shortline railroads. ExpressYard is a flagship service offering of SSG Innovations LLC, a software and hardware solution provider to the rail industry.
